2152

SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	02/05/2007	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary	Application No. 10/799,033	Applicant(s) PULLEY ET AL.	
	Examiner Kenny Lin	Art Unit 2152	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 November 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 13-23, 36-46 and 59-102 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 13-23, 36-46, 59-102 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. Claims 13-23, 36-46, 59-102 are presented for examination. Claims 1-12, 24-35 and 47-58 are canceled.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 13-18, 36-41, 59-64, 70-71, 74, 77, 79-80, 83, 86, 88-89, 92, 95 and 97-102 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huitema, WO 99/27680, in view of Sitaraman et al (Sitaraman), US 6,427,170.

4. Huitema was cited in the previous office action.

5. As per claims 13, 36 and 59, Huitema taught the invention substantially as claimed including a method of providing an IP address for a host in a computer network, the method comprising the steps of:

- a. A processor (computer is inherent to comprise processors) configured to:
receiving, from a client in a computer network, at an appliance a request for an IP

Art Unit: 2152

address associated with a domain name (page 1, lines 19-21, 26-40, page 2, lines 5-6; receiving at local server);

- b. Retrieving the requested IP address from a database associated with the appliance (page 1, lines 28-33, page 2, lines 5-11, 20; local cache);
- c. Transmitting the retrieved IP address to the client (page 2, lines 5-8).

6. Huitema did not specifically teach to that the database is object oriented database and that retrieving includes

- i. Accessing a first network object in the object oriented database, wherein the first network object is associated with a first IP sub-network;
- ii. Identifying a second network object in the object oriented database, wherein the second network object is associated with a second IP sub-network and the second network object is linked to the first network object; and
- iii. Obtaining the IP address based at least in part on the second network object.

7. Sitaraman taught that database can include object-oriented database and to obtain IP address by accessing network objects of a first sub-network referencing other objects of other sub-network (col.2, lines 33-67, col.3, lines 1-3). It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the teachings of Huitema and Sitaraman because Sitaraman's teaching of address mapping enables Huitema's method to return

Art Unit: 2152

the IP address mapped to the domain name using a reference to a top-level DNS which has further address mapping information or the IP address.

8. As per claims 14, 37 and 60, Huitema and Sitaraman taught the invention substantially as claimed in claims 13, 36 and 59. Huitema further taught the step of establishing communicative coupling between a client web browser and the appliance (page 1, lines 26-29).

9. As per claims 15-17, 38-40 and 61-63, Huitema and Sitaraman taught the invention substantially as claimed in claims 13, 36 and 59. Huitema further taught that wherein the computer network comprises the Internet, an IP based computer network and an intranet (300, fig.3, page 1, lines 19-21, page 4, lines 13-17).

10. As per claims 18, 41 and 64, Huitema and Sitaraman taught the invention substantially as claimed in claims 13, 36 and 59. Huitema further taught that the appliance receives the request (fig.1, page 1, lines 28-29, page 4, lines 13-19).

11. As per claims 70, 79 and 88, Huitema and Sitaraman taught the invention substantially as claimed in claims 13, 36 and 59. Sitaraman further taught that the operating system is derived from a full operating system that includes the at least one software component (col.6, lines 1-16).

12. As per claims 71, 80 and 89, Huitema and Sitaraman taught the invention substantially as claimed in claims 13, 36 and 59. Sitaraman further taught that the at least one software

Art Unit: 2152

component includes one of the following: a driver or a utility software (col.6, lines 1-16, col.7, lines 23-29).

13. As per claims 74, 83 and 92, Huitema and Sitaraman taught the invention substantially as claimed in claims 13, 36 and 59. Huitema further taught that the network name-related functionality comprises the DNS and the IP address comprises a requested IP address associated with a host identified in a DNS request received at the appliance (page 1, lines 24-40, page 2, lines 5-14).

14. As per claims 77, 86 and 95, Huitema and Sitaraman taught the invention substantially as claimed in claims 13, 36 and 59. Huitema further taught that the appliance includes a DNS server, a configuration server, a web server, a database, and/or a GUI (page 1, lines 24-40, page 2, lines 5-14).

15. As per claims 97-99, Huitema and Sitaraman taught the invention substantially as claimed in claims 13, 36 and 59. Sitaraman further taught that the first IP sub-network and the second IP sub-network are included in a logically hierarchical set of IP sub-network information; and the object oriented database comprises a hierarchical structure associated with the logically hierarchical set of IP sub-network information (col.2, lines 33-67, col.3, lines 1-3).

16. As per claims 100-102, Huitema and Sitaraman taught the invention substantially as claimed in claims 13, 36 and 59. Sitaraman further taught that the second network object is a

Art Unit: 2152

parent of the first network object in the hierarchical structure in the object-oriented database (col.2, lines 33-67, col.3, lines 1-3: top-level).

17. Claims 19-23, 42-46 and 65-69 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huitema and Sitaraman as applied to claims 13, 36 and 59 above, and further in view of Frank et al (hereinafter Frank), US 6,832,120.

18. Frank was cited in the previous office action.

19. As per claims 19-23, 42-46 and 65-69, Huitema and Sitaraman taught the invention substantially as claimed in claims 13, 36 and 59. Huitema and Sitaraman did not specifically teach the system to further linking a host object with a network object and a zone object, the zone object is linked to another zone object, the network object is linked to another network object, unlinking an old network object from a host object; deleting the old network object; and linking the host object to a new network object and automatically updating the host object to reflect an association with the new network object. Frank taught that custom objects can be programmed and linked together to support applications (col.2, lines 6-15) and the links can be deleted, added or reconfigured in real time (col.5, lines 54-59). It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the teachings of Huitema, Sitaraman and Frank because Frank's teaching of creating custom objects and linking objects enables Huitema and Sitaraman's system to use custom objects to support system applications.

20. Claims 72-73, 81-82 and 90-91 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huitema and Sitaraman as applied to claims 13, 36 and 59 above, and further in view of "Official Notice".

21. As per claims 72-73, 81-82 and 90-91, Huitema and Sitaraman taught the invention substantially as claimed in claims 13, 36 and 59. Huitema and Sitaraman did not specifically teach the appliance excludes a hardware component/communication port that typically is included in a host computing system but that is not required to provide the network name-related functionality. Official Notice is taken that the concept and advantage of eliminating or uninstalling unused hardware component on a computer is well known and expected in the art. It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the teachings of Huitema and Sitaraman and further assemble a host computer with only the needed components to reduce the cost of the system and further simplify the installations.

22. Claims 75-76, 84-85 and 93-94 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huitema and Sitaraman as applied to claims 13, 36 and 59 above, and further in view of Boden et al (hereinafter Boden), US 6,832,322.

23. Boden was cited in the previous office action.

Art Unit: 2152

24. As per claims 75, 84 and 93, Huitema and Sitaraman taught the invention substantially as claimed in claims 13, 36 and 59. Huitema and Sitaraman did not specifically teach to provide an interface for configuring the appliance. Boden taught to configure a DNS server system using a graphical user interface (col.7, lines 19-35, 43-47). It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the teachings of Huitema, Sitaraman and Boden because the Boden's teachings of using graphical user interface for controlling and configuring the DNS server enables Huitema and Sitaraman's system to access and configure the remote DNS servers to avoid redundant copies of information contained (Boden, col.7, lines 19-20).

25. As per claims 76, 85 and 94, Huitema and Sitaraman taught the invention substantially as claimed in claims 13, 36 and 59. Huitema further taught to user client web browser to send request to the appliance (page 1, lines 26-29). Huitema and Sitaraman did not specifically teach to provide a web interface for configuring the appliance. Boden taught to configure a DNS server system using a graphical user interface (col.7, lines 19-35, 43-47). It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the teachings of Huitema, Sitaraman and Boden because the Boden's teachings of using graphical user interface for controlling and configuring the DNS server enables Huitema and Sitaraman's system to access and configure the remote DNS servers to avoid redundant copies of information contained (Boden, col.7, lines 19-20).

Art Unit: 2152

26. Claims 78, 87 and 96 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huitema and Sitaraman as applied to claims 13, 36 and 59 above, and further in view of Belzile, US 6,801,952.

27. Belzile was cited in the previous office action.

28. As per claims 78, 87 and 96, Huitema and Sitaraman taught the invention substantially as claimed in claims 13, 36 and 59. Huitema and Sitaraman did not specifically teach that the database is an object oriented database. Belzile taught to store IP address in object oriented database (col.5, lines 32-43). It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the teachings of Huitema, Sitaraman and Belzile and use an object oriented database as the database disclosed in Huitema and Sitaraman's system to store and retrieve IP address.

Conclusion

29. Applicant's arguments with respect to claims 13, 36 and 59 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

30. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Vange et al, US 2002/0004796.

Art Unit: 2152

Skene et al, US 7,047,301.

31. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action..

32. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenny Lin whose telephone number is (571) 272-3968. The examiner can normally be reached on 8 AM to 5 PM Tue.-Fri. and every other Monday.

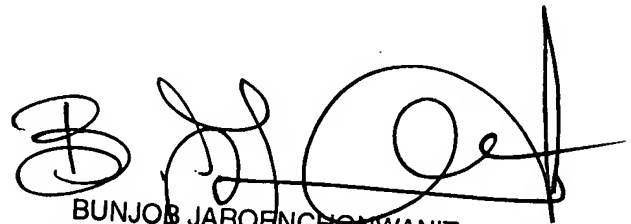

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bunjob Jaroenchonwanit can be reached on (571) 272-3913. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Art Unit: 2152

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
